Hi All,

This question is region-specific, but it came to us from the region. Could you all work on this to see if you can come up with a response please? Thanks!

I don't understand your question.

Please work with the EOC on this.

Christie St. Clair

Office of Public Affairs

Environmental Protection Agency

Matt:

I don't have information on the impacts on any specific sites so will forward your request to the Joint Information Center.

EPA has set-up a mail for press inquiries about the Gold King Mine release so you can now submit questions directly to press@epa.gov. I've already copied them on this reply so you don't have to resend.

Also, we have a phone line in our Joint Information Center staffed by press officers so you follow-up, if needed, at: 970-812-3351.

Laura Jenkins

INQUIRY: I saw the announcement yesterday that the EPA was suspending field work and I wanted to check in to see if that had any impact on the Nelson Tunnel Superfund site above Creede. The document linked below and posted by EPA in May seems to indicate that this summer's work was mainly sampling and testing of streams in the area. If that's the case, will that work also be halted?
